

# ONPOINT™

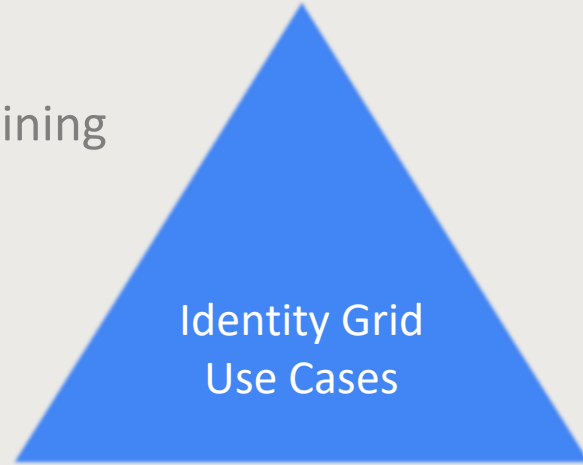

---

- PROOF OF LOCATION
- PROOF OF ATTENDANCE
- 4D COMPLIANCE AT SCALE

*You have a chip in your biometric passport. We make such passports for geolocations, commercial premises, auditoria, you name it. Internet-connected mobile device can collect a proof of attendance. No personal data involved. No satellite – no mains power required. Cryptographically unspoofable, clone-resistant, and highly available.*

Industry and Public  
*service tracking across sparse fields and facilities*

Education and Training  
*attendance*

Retail and Delivery  
*visit-based marketing and checkpoints for delivery agents*

Quick structural embedding of the passports onto any surface
